Professional Summary

I am a passionate computer science student with strong communication skills and collaborative mindset. With hands-on experience in web development, AI-driven applications and software engineering, I love creating tech that solves real-world problems.

Education

Bundelkhand University **Nov 2022-July 2026**

Bachelor of Technology in Computer Science and Engineering, 8.38 CGPA *Jhansi, Uttar Pradesh*

Mahatma Hansraj Modern School *Jhansi, Uttar Pradesh*

Class XII, CBSE, Secured 95.6 Percentage **July 2020-July 2021**

Class X, CBSE, Secured 94.6 Percentage **July 2018-July 2019**

Relevant Coursework

- Data Structure & Algorithm
- Database Management System
- Computer Networks
- Operating Systems (OS)
- Object-Oriented Programming (OOPs)

Experience

IIT Kanpur *On-Site*

Frontend Developer Intern **June 2025-July 2025**

- Build clean, responsive and user-friendly web pages using HTML, CSS, JavaScript and React.
- Worked with a team to connect APIs, fix bugs and improve website design and performance.

Crazy WebDev Technologies *Remote*

Web Developer Intern **Feb 2024-June 2024**

- Developed and maintained dynamic website using HTML, CSS, JAVA SCRIPT. Enhanced user experience by incorporating responsive design principles and BOOTSTRAP framework.

Product Development Team Lead **November 2024**

- Collaborated with a team of frontend developers to design and launch this educational platform using Agile methodologies and JIRA framework.
- jQuery and modern Javascript frameworks, resulting in a 20% increase in user engagement through improved user interface functionality and experience.

Projects

QuickQ **January 2025**

- Created a smart cloud-based queue management system allowing users to book slots, virtual check-ins, dynamic priority queues and receive real-time updates.

Agroguardian **August 2024**

- Built an app that detects and manages crop diseases using machine learning algorithms. I am a developer in this project.

Aurasafe **September 2024**

- Developed a Women Safety Analytics Software app with real-time monitoring, gender-based analytics and emergency detection.

Under25 Universe **February 2025**

- Redesigned Under25 Universe Website with more sections and uniqueness.

Achievements

- Tech Lead of **GDG (Google Developer Group)** BU Core team and Team Member of TCH (The Coder's Hub).
- Completed **AI Skills Passport** Course by **Microsoft** and EY.
- Trooper Ranker in **Google Arcade Cloud**.
- **ISRO** course on **AI/ML** for Geodata Analysis.
- Solved **500+** Leetcode, **300+** Gfg Problems.
- Among top **2 teams** of our college in **Smart India Hackathon** 2024 (Waitlisted).
- Attended Python Programming by **IIT Kanpur** and **Softpro**.
- Selected for **IDE** (Innovation, Design and Entrepreneurship) Bootcamp 2 times.
- **2nd Prize** in Prastuti 2.0 for Agroguardian App.
- Selected for **IDE** (Innovation, Design and Entrepreneurship) Bootcamp 2 times.
- **2nd Prize** in Social Media Competition in IDE Bootcamp.

Technical Skills

Languages: Python, HTML, CSS, JAVASCRIPT, PHP

Developer Tools: Vs Code, Xampp, JIRA, Chrome DevTools

Technologies/Frameworks/Libraries: Git, Github, Bootstrap, ReactJS, NodeJS

Database: MySQL, MongoDB

Others: Designing (Canva, Figma), Communication, Management, Problem-Solving and Critical-Thinking Skills
